

1 Point Perspective w/Pencil

In this lesson, you'll learn how to do the following:

- ☐ Draw using 1 point perspective

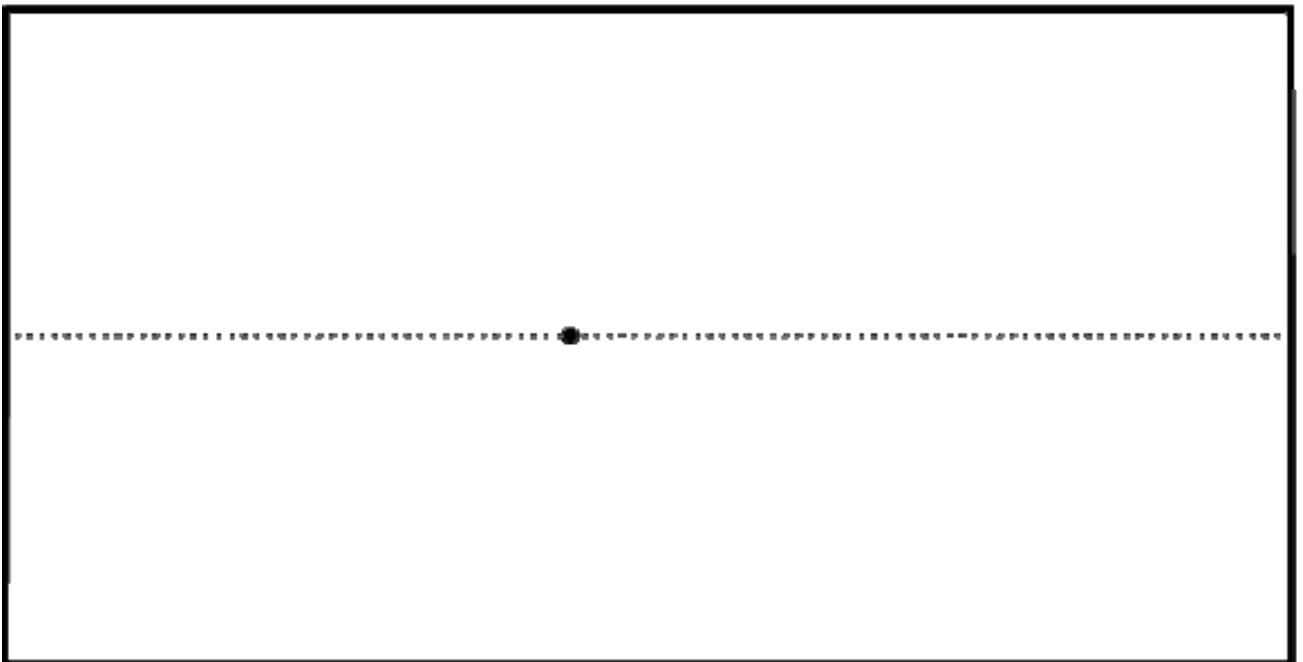

Geometric Shapes (5pts)

Use the template below and a ruler to practice drawing in one point perspective. In the template, draw at least five boxes: two below, two above and one even with the horizon line.

City Shapes (5 pts)

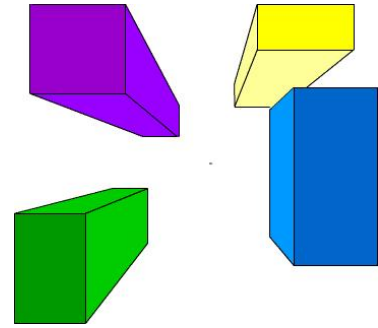

Use the template below and a ruler to practice drawing in one point perspective. In the template, draw a city with as much detail as possible.

1 Point Perspective w/Flash

In this lesson, you'll learn how to do the following:

- ☐ Download a template from the Sharepoint
- ☐ Draw in flash using the line tool
- ☐ Fill closed objects in Flash using the paint bucket
- ☐ Use keyboard shortcuts
- ☐ Draw in Flash using 1 point perspective

Activities

Download the 1 point perspective template from the Sharepoint to your user_share. Open the file and then save as "lastname_1pt_geometric". Watch the tutorial for how to do this and complete the activity. Version 1 should just be geometric shapes (minimum of 5) with color (**5 pts**). Version 2 should be a realistic city scene with buildings (**5 pts**). Export a .gif image of both your buildings **and** geometric shapes. To turn them in, copy the .gif files and paste them in the **Animation** drop box in the **Drop Box** folder on the **HTLC** server. Watch the tutorial on turning in work if you don't know how to do this.
